Why is this happening?

- Our search engine fundamentally works differently from the one Scopus is using
- The problem with ANDs
- “Distance” AND “Learning” = SDG4 (Quality Education)
- But articles contain many words...

Possible Solution #1

- Swap AND for NEAR
- **Problem:** But how NEAR?

Possible Solution #2

- Swap Xapian for Elastic Search
- **Problem:** A resource intensive solution

Possible Solution #3

- Use the Scopus API
- **Problem:** SDGs aren't surfaced via API

Possible Solution #4

- Use the Dimensions API
- **Problem:** Don't have an API account

Possible Solution #5

- Use OSDG
- We can get API access
- Not duplicating effort
- Comes out of the UN Development Program

OSDG Results

Sometimes a text can contain linkages to other SDGs.
Here is the full list of SDGs we found in your text, along with the estimated relevance scores.

Your key SDGs

OSDG identified 2 key SDGs for your PDF file:

History-of-education-in-the-third-reichs-special-schools-and-elite-schools.pdf

SUGGEST SDG LABELS

Benchmarking Take 2

The Biopolitics of Education in the Third Reich’s ‘Special Schools’ and ‘Elite Schools’

Eprints SDGs V1	Scopus	Dimensions	OSDG
13	1	1	2

The Biopolitics of Education in the Third Reich’s ‘Special Schools’ and ‘Elite Schools’

Eprints SDGs V1	Scopus	Dimensions	OSDG
13	1	1	2

Next Steps and Conclusions

- Need to test OSDG in anger
- Human review is still a good idea
- (Several) Tools already exist

Thoughts and ideas welcome!
